

## Genesis 1:1

*In the beginning God created the heavens and the earth.*

There are so-called, man-made gods of the sun, moon, stars, fish, and so many different things. Yet these are all false Gods.

In the very beginning of the bible the first thing God says is that **He** created all things. Including all these things the world worships as false gods.

Now it's not wrong to enjoy a sunset, or a moonlit night. Personally I do photography on the side, and one of my favorite things to capture is a beautiful sunset or sunrise, or a huge full moon in the sky.

It's not wrong to enjoy your fish dinner.

It's even ok to enjoy all the things on the earth, like trees flowers, animals, lakes rivers waterfalls, etc... Also it's ok to enjoy the things in heavens like the sun and moon and stars, just don't worship them, but rather worship the creator of all these things.

Who is the creator of all these things? Non-other than GOD. There is only one God and He is the one you should be worshiping. Not His creation.

**Romans 1:25 (NLT)** *Instead of believing what they knew was the truth about God, they deliberately chose to believe lies. So they worshiped the things God made but not the Creator himself, who is to be praised forever. Amen.*

So spend today thanking God for His creation, and not the creation for a god.
